WHAT WERE THE FUND COSTS FOR THE PAST YEAR? (based on a hypothetical \$10,000 investment)

Fund Name	Costs of a \$10,000 investment	Costs paid as a percentage of a \$10,000 investment
Prospector Opportunity Fund	\$135	1.27%

HOW DID THE FUND PERFORM LAST YEAR AND WHAT AFFECTED ITS PERFORMANCE?

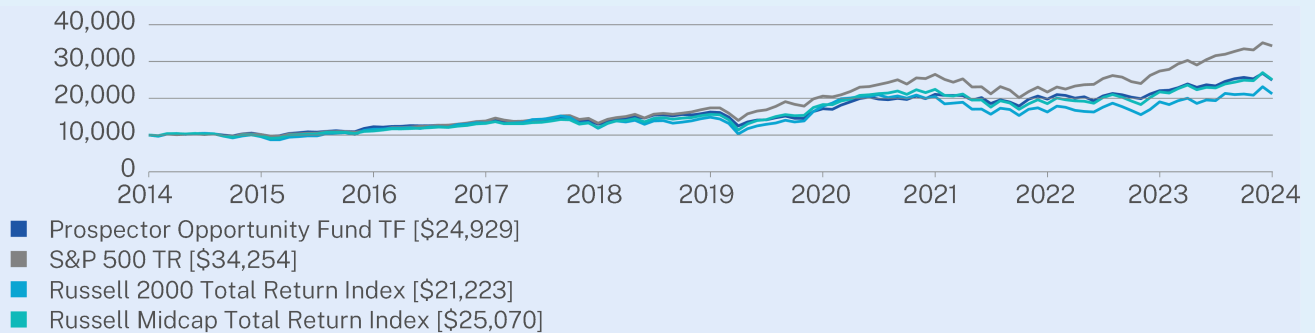

Prospector Opportunity Fund underperformed the Russell Midcap Index but outperformed the Russell 2000 during the year ended December 31, 2024.

The largest contributors to the Fund's underperformance against the Russell Midcap was due to the Fund's underweight and underperformance within the technology sector, and also weakness in the Fund's energy names. This more than offset outperformance within financial services and industrials. When comparing against the Russell 2000, the Fund's outperformance in financials, industrials and consumer discretionary more than made up for relative underperformance within the technology and materials sectors. Given the strong stock market during 2024, cash balances were also a contributor to relative underperformance versus the benchmarks.

HOW DID THE FUND PERFORM OVER THE PAST 10 YEARS?*

The \$10,000 chart reflects a hypothetical \$10,000 investment in the class of shares noted and assumes the maximum sales charge, if applicable. The chart uses total return NAV performance and assumes reinvestment of dividends and capital gains. Fund expenses, including 12b-1 fees, management fees and other expenses were deducted.
